warm up what's new/what's hot

Flying Carpet

T Mat Pro, \$30-35

T Mat Pro triathlon mats are designed specifically for quick and easy changes during triathlon races. The neoprene mat makes it easy to identify your space in transition and offers a soft, absorbent surface to transition to the next event. At the end of the race that mat cleans off with ease and hangs easily to dry. New this year are specialty T mats that feature a purple-toned love and peace design and a brilliant Hawaiian aloha flower pattern. You can also use them for yoga and stretching workouts, too.

Keep On Keeping Cool

Arctic Ease Cryotherapy Pads, \$9.99 and Wraps, \$14.99

A great way to ice those aching joints or muscles after a workout, these adhesive- and latex-free Cryotherapy pads and wraps conform to your body, offering cooling therapy without having to use ice. These reusable products conform right to the injured area, stay cold for hours and don't need any refrigeration.

Aerodynamic Add-ons

Profile Design T2+ Cobra, \$240 black, \$270 white

The latest iteration of these classic add-on tri or time trial bars offer an aggressive, low hand position. The multi-directional carbon fibre extensions and injection molded F-22 anatomic armrests can be adjusted for virtually any length, width or angle. The J2 Brackets provide an even lower arm position for the ultimate in aerodynamics. **T**
